

nexi Tax-free shopping

Added value without value added tax

For 2017, the total volume of tax-free shopping is forecast to exceed €52 billion in Europe. The number of nights spent in Germany by travellers from China alone is more than two million per year. Take advantage of this and enable your foreign customers to use the Nexi tax-free function for great prices – without any additional effort on your part.

With the Nexi tax-free function, the tax-free form is created while the payment is being processed – regardless whether payment is in cash or by credit card. After payment, non-EU citizens will receive a slip showing the amount of VAT to be refunded. The only pre-requisites are that the customer may not spend longer than six months in the EU and the purchase must have been for greater than €25.

When the non-EU citizen then leaves Germany, they will receive the VAT percentage from their purchase back as a refund. For your customers, this means a savings of up to 19 per cent – one more reason to shop with you. For you, this also means no more filling out slips by hand.

Option for the additional Nexi tax-free shopping function on your Nexi terminal.

YOUR CHOICE WITH THE NEXI MULTIPLE TAX-FREE FUNCTION

Design tax-free shopping innovative and easy in order to offer relaxed shopping experiences. Planet Tax Free ensures stress-free and tax-free buying and selling for tourists and dealers. Global Blue works with 270,000 merchants, shopping brands and hotels worldwide – in over 40 countries.

YOUR BENEFITS

- **Increased sales:** satisfied customers and increased sales thanks to additional incentive to buy
- **Customer-oriented:** improved service for your foreign customers
- **Fast:** easy to use and fast processing at the POS
- **Convenient:** electronic registration of the receipts
- **Easy:** everything from a single source – you have only one contract with Nexi
- **Direct:** automatic recognition of tax-free eligibility with credit card payments

BONUS TIP

Together with dynamic currency conversion (DCC) – the automatic currency conversion feature – you can offer international customers the best possible service. When making payment, your customers have the option of paying in euros or in their home currency at the current daily exchange rate.
