

nexi Desk POS Base Next

A clever combination of function and quality

Flexible placement in your business – thanks to the Wi-Fi module and the one-cable solution, the Base Next is simple and straightforward to integrate at any checkout area. All you need is a mains outlet. The placement of the contactless reader at the head of the terminal enables the cardholder to clearly see the amount and the status of the transaction.

**STATIONARY
AND COMPACT**

With the integrated Wi-Fi module and the next-generation processor, the Nexi Desk POS Base Next combines fast transaction processing and a flexible selection of the checkout location, regardless of where your fixed telecommunications are located. Together with the new location of the contactless reader, the large colour display with high-resolution touchscreen ensures convenient and easy processing of card payments. Save time for your customers.

YOUR BENEFITS

- Powerful Cortex-A9 processor with 1 GHz
- Large 4-inch colour display with highly sensitive touchscreen
- Integrated Wi-Fi module
- Small footprint (181 x 83 x 72 mm)

THE FUNCTIONS AT A GLANCE

- Integrated graphic-enabled thermal printer with up to 50 lines per second
- Connection possible via ZVT and O.P.I. checkout interface

FULL CARD FLEXIBILITY

- All payment methods processed, including NFC/contactless and EMV chip

EXTRAS FOR BETTER SERVICE

- Positioning of the contactless reader directly at the head of the terminal, which means that the display is not hidden as is the case with other contactless payments

SECURITY AS STANDARD

- Chip card reader reads data from tamper-proof chips
- Latest security architecture in line with PCI 6
- Certifications: EMV Level 1 and 2, PCI PTS 6.x, DK TA 7.2
